VideoDownload moviestorm 1.1 free crack serial key 2 . moviestorm 1.1 download full version for android Category:Free and open-source Android software Category:Articles containing video clipsQ: Add filename to uploaded file I'm trying to add a file name to the file that is being uploaded using the following code: if(isset(\$\_FILES["file"]["name"])){ \$name = \$\_FILES["file"]["name"]; \$type = \$\_FILES["file"]["type"]; \$size = \$\_FILES["file"]["size"]; \$tmp = \$\_FILES["file"]["tmp\_name"]; \$error = \$\_FILES["file"]["error"]; if(empty(\$error)){ echo "The file was uploaded successfully."; \$file = \$\_FILES["file"]["tmp\_name"]; \$tmp2 = "temp."; \$name = move\_uploaded\_file(\$tmp2, "images/".\$name); } } This is the script that adds the temp file from the temp directory to the images directory. However I want to be able to add the file's name to the bottom of the file in the images directory. I also want to add the file type as well. How do I add the filename? Also, the script is only working on my local server, is this because I need to run it through cron to function properly? A: Its better to use the \$\_FILES Array, to upload and retrieve a file like this: //set some variables \$name = \$\_FILES["file"]["name"]; \$type = \$\_FILES["file"]["type"]; \$size = \$\_FILES["file"]["size"]; \$tmp = \$\_FILES["file"]["tmp\_name"]; \$error = \$\_FILES["error"]; \$file = \$\_FILES["file"]["tmp\_name"]; \$tmp2 = "temp."; \$name = move\_uploaded\_file(\$tmp2, "images/".\$name); } } This is the script that adds the temp file from the temp directory to the images directory.
